

Meadow View

*"Chloe is a truly lovely girl who is flourishing socially, emotionally and academically and is now determined to achieve her aspirations in life"*

## Chloe's story

Prior to joining Meadow View, Chloe had very low self-esteem and struggled with family life which contributed to her regularly absconding from school and involving herself in high-risk behaviours. Despite being academically very able, her behaviour and poor attitude had a considerable effect on her education and when challenged she presented with aggressive behaviours.

## Support

Meadow View staff quickly recognised the gaps in Chloe's education and her lack of essential life skills, during initial assessments and time spent with her. Teaching and pastoral staff alongside our therapy team, began to plan and create strategies for Chloe, allowing her to access the whole curriculum and setting appropriate challenges in which she could overcome and progress using things that she was interested in. Chloe engaged well with the whole plan, progressing well with her education and gradually developed a sense of worth that helped her to flourish and reveal her potential academically. In addition to this, she also began to trust staff which enabled her to settle into life at Meadow View.

## Achievements

Chloe is now thriving at Meadow View as she engages well in lessons and produces fantastic pieces of work, along with developing essential life skills that will enable her to be successful in the future. In year 10, Chloe achieved GCSE Grade 3 in Maths and is on target to attain more GCSE qualifications by the end of year 11. Chloe's confidence has grown greatly; she is undertaking work experience sessions preparing her for life after Meadow View and regularly tries activities that she was unsure of in the past. Chloe is a truly lovely girl who is flourishing socially, emotionally and academically and is now determined to achieve her aspirations in life.
